The old, modern city Munich, Germany

Facination awaits
Known for being both a modern metropolis as well as a city full of history, Munich is famous for its beautiful architecture, fine culture, and the annual Oktoberfest beer celebration.

Munich has outstanding museums and art galleries, such as The Deutsches Museum on an island in the Isar River.

The city center is defined as the area within the old city fortifications, where many sections of the historical walls are still visible. Many of the main tourist attractions can be found in the City Center. For those looking for luxury brands, can enjoy Munich´s famous shopping-mile located near the course venue.

Munich's ability to stay at the forefront of technological developments and maintain its cultural heritage is often summarized in the characterization as a city of “laptop and lederhosen”.

How to Get there
The beautiful city of Munich is easily reached via Munich International Airport.

Overview Course Content

This course offers participants an in-depth training on esthetic and prosthetic driven implantology, given by our experts Dr. Cacaci and Dr. Randelzhofer.

- After completion
Participants will be able to:
- understand the 3-dimensional ideal implant position in the esthetic zone
 - apply soft tissue grafting techniques
 - use different suturing techniques
 - use immediate temporary restorations for emergence profile development
 - understand the use of roll flaps for second stage surgeries

- Requirements
Dentists must have:
- advance knowledge of implantology
 - have a focus on the esthetic zone

Certificate
You will receive a certificate for 12 hours continuing education.

Course Location
Implant Competence Centrum
Gemeinschaftspraxis
Cacaci & Randelzhofer
Weinstrasse 4
80333 Munich/Germany

Content
The course is flexible enough that it can provide a robust learning experience for clinicians who have either a basic or advanced clinical experience level.

Hands-on and the live surgery procedures are held at the Implant Competence Centrum Gemeinschaftspraxis Cacaci & Randelzhofer.

This course is given over a two-day priod. Topics include advanced techniques on esthetic restorative procedures, suturing techniques and emergence profile development. Participants will receive theoretical, hands-on, and live surgical training. Hands-on procedures on pig-ears provide an opportunity to refine suture techniques, grafting procedures and harvesting techniques for soft tissue grafts.

During the live-surgery portion of the course, topics covered include roll flaps, how an emergence profile is developed as well as implant surgery with GBR in the esthetic zone.
