

To strengthen our team in Basel,  
we are looking for a

## Technical Editor (m/f/d)

### Your responsibilities

- Drafting and revising product documents (instructions for use and work instructions)
- Coordinating content, the correct presentation and the completion of the documentation
- Obtaining the necessary information, as well as organizing, coordinating and ensuring that the documents are ready by the deadlines
- Translation management of more than 20 languages
- Further development of documentation tools and processes with the aim of continuously improving the quality of publications, taking new standards into account
- Close cooperation with various disciplines such as product management, marketing, development, regulations, quality management and procurement
- Supporting external service providers
- Appropriate further training such as technical editor
- Several years of professional experience as a technical editor or at least 7 years as an international product manager
- Expertise in oral implant dentistry and knowledge of regulatory requirements for medical devices is preferred
- Analytical and systematic approach, as well as entrepreneurial thinking and behaviour are a plus
- Excellent MS Office skills
- Fluent German and very good English skills, both written and spoken
- Knowing other languages will be an advantage (Italian, French, Spanish)

### Your profile

- Training as a dental technician or dentist, product manager with many years of experience in dental implantology

### Your prospects

- Challenging job in an exciting environment
- International employer with team-oriented working atmosphere
- Attractive employment conditions

**Do you find this offer appealing, do your professional and personal requirements match the job profile? Then we look forward to receiving your detailed application.**
