Dear Partners and Friends of Camlog

Once again, we proudly present our highly professional training courses in Berlin, Munich and, new this year, also in Sevilla.

Our courses are a great platform for networking with other professionals. On top of that, you will certainly be impressed by these stunning cities and enjoy social activities away from your everyday routine.

CAMLOG courses build on a long-standing experience in dental education, and we are lucky to collaborate with renown speakers who vouch with their names to make your course a success.

We are looking forward to welcoming you to our courses in order to make 2017 an exciting and successful year in your personal education.

LANDSHUT

Landshut is a town in Bavaria in the south-east of Germany. Undoubtedly, the old town of Landshut has some of the most beautiful and best preserved historic streets in Germany. From the colorful variety of stately homes, the tower of the Gothic church of St. Martin stands out impressively. It is the tallest brick tower in the world (130.08 m) and the symbol of the city.

Equally impressive, the stately city residence in the city center boasts an arcaded courtyard. This palace, the first Renaissance palace north of the Alps, proves that stays in southern climates inspired our ancestors.

Trausnitz castle sits majestically above the old and new town, the churches and monasteries, the numerous streets and town squares. The Isar River, for centuries the natural northern city limit, today runs through the town center and invites you for a stroll. There are plenty of cafes and restaurants along the Altstadt, the town's main shopping street.

Due to its proximity and easy access to Munich and the Franz Josef Strauss International Airport, Landshut has become an attractive business and tourist destination.

Dr. Stephan Beuer, M.Sc.

Clinic Münchnerau
Weiherbachstraße 2
84034 Landshut/Stadteil Münchnerau
Germany

Tel. +49 871 965 860 0

Email info@praxisklinik-muenchnerau.de

BEUER & BEUER

The Münchnerau clinic offers state-of-the-art equipment to meet the latest medical requirements and needs of their patients. In addition to digital X-ray, 3D X-ray (digital volume tomography) and a sophisticated quality management system the clinic provides fully air-conditioned consulting rooms for the comfort of its patients. Of course, you will find free parking spaces directly in front of the practice. An in-house bistro offers you or accompanying persons a waiting area for snacks and refreshments.

We fulfill the highest quality standards using the most modern medical equipment. In order to always meet the latest standards of medical science ("state of art"), ongoing continuing education and training are an absolute "must" for our staff. These are offered "in-house" in various courses and lectures.

DR. STEPHAN BEUER, M.SC.

Dentist, Oral surgery, Implantology, Periodontology

Education

- 1997 – 2003 Dental School in Regensburg/Germany
- 2003 Approbation (DDS) University of Regensburg

Professional life

- 2003 – 2005 Employed Dentist in Private Practice for General Dentistry
- 2005 – 2009 Employed in Private Practice for Oral and Maxillofacial Surgery
- 2006 Dissertation (Dr. med. dent.) University of Regensburg
- 2008 Professional in Oral Surgery
- 2009 Master of Science (M.Sc.) in Orthodontics, Danube University/Austria
- 2010 Founder of "Praxisklinik Münchnerau", Clinic for Oral Surgery in Landshut/Germany
- 2013 Member of "Neue Gruppe"

PROF. DR. MED. DENT. FLORIAN BEUER, MME

Dentist, Implantology, Prosthodontics

Education

- 1994 – 1999 Dental School at Ludwig Maximilians University Munich, Germany
- 2000 Approbation (DDS) Ludwig Maximilians University

Professional life

- 2000 – 2001 Employed Dentist in Private Practice
- 2002 Dissertation (Dr. med. dent.) Ludwig Maximilians University
- 2005 Specialist in Implantology (German Society of Implantology)
- 2007 – 2008 Visiting Professor at Pacific Dental Institute, Portland, Oregon (Director: John A. Sorensen DMD, PhD)
- 2009 Habilitation (Priv. Doz., PhD) Ludwig Maximilians University
- 2009 Specialist in Prosthodontics (German Society of Prosthodontics and Biomaterials)
- 2009 – 2015 Board member German Academy of Esthetic Dentistry
- 2011 Board member German Society for Ceramics in Dentistry
- 2014 Title "Full Professor" Department of Prosthodontics, Ludwig Maximilians University
- 2015 Chair and Medical Director Department of Prosthodontics, Charité University Medicine Berlin
- 2015 Master in Medical Education (MME, University of Heidelberg)

POSSIBLE DATES

(Arrival 1 day in advance)

PARTICIPANTS

3. March – 4. March 2017**10. November – 11. November 2017**

Travelling to the beautiful city of Landshut you best fly to the Munich Airport.

Coming from Munich Franz-Josef-Strauß Airport, you will have direct connections to Landshut by using the public transportation (DB, Deutsche Bahn). Duration approx. 45 minutes.

Tickets can be bought at the station from the ticket office, at a ticket machine or at the DB website before you get on the Train. Ticket machines give instructions in four languages, including English.

Minimum 8 participants**Maximum 12 participants**

TOPICS**Theory**

- Sedation techniques "intra venous"
- Sinus elevation techniques
- Lateral approach
- Palatal approach
- Pros & cons "Botis bone building technique" with allogenic bone blocks
- 3D CAD/CAM approach
- Clinical case presentation
- Clinical case discussion
- Digital dentistry
- Partial and full digital workflow in implant procedures
- CAD/CAM solutions

Hands-on exercises

- Sheep heads
- Sinus elevation lateral approach conventional technique
- Piezo surgery
- Pig jaws
- Bone block preparation using Piezo technique from a plastic bone piece

Live-Surgery

- Case presentation
- Bone augmentation
- "The Munich Concept" of digital implant procedure
- Patient 1 implant placement
- Patient 2 CAD/CAM produced restoration installation

BERLIN

Berlin is an amazing, multifaceted city with rich offerings for visitors of all ages, budgets and interests. Whether your interests lie in history, art, music or partying, Berlin has a multitude of offerings to satisfy your desires. It is a city where you can dine in a Michelin starred restaurant or munch down on a Currywurst (sausage) before watching Barenboim conduct a performance of Puccini's Tosca at the Opera. In Berlin anything is possible.

Berlin's fascinating history is etched into the fabric of its cultural, architectural and commercial attractions. From Prussian monuments and palaces to the cold war era Berlin Wall, each period of Berlin's often tumultuous history has left its mark and created what is one of the most exciting and interesting cities in the world.

Berlin is like a great piece of music. At first listen you find it interesting and intriguing, but with each subsequent listen you discover something new, an instrument you hadn't heard, or a lyric that had a subtle double meaning. With each hour you spend in Berlin you will fall more and more in love with this fascinating city, its history and its people.

HILDEBRAND & BEUER

We pride ourselves on our open and warm communication with our patients and colleagues alike. We create a pleasant experience for our patients keeping them informed throughout their treatment journey.

There are no "off the shelf" teeth – each treatment plan is customized for each patient, his teeth and his possibilities. It does not matter what the patient background is, we have a solution available.

We will find the best quality care solution for each patient. We are specialists with different know-how and many years of experience in our practice for the benefit of our patients.

Teeth alone are not the focus, but the individual person with his or her wishes, fears, needs and concerns is. We not only focus on the dental treatment, but also offer patients caring advice and attention every step of the way.

POSSIBLE DATES

(Arrival 1 day in advance)

15. December – 16. December 2017

PARTICIPANTS

Minimum 8 participants
Maximum 12 participants

TOPICS

Theory

- 3D planning utilizing the smop software
- Immediate restorations using guided procedures and preoperative fabricated temporary restorations with the COMFOUR screw retaining system
- Case presentation of guided cases immediate or late restorations
- Advantage and disadvantage of immediate procedures
- Digital workflow in implant dentistry (CAD/CAM)
- Surgical and restorative aspects

Hands-on exercises

- 3D planning with the smop software on PCs
- Guided surgery with smop surgical guides on plastic models

Live-Surgery

- Guided surgery with smop & COMFOUR immediate restoration on implants
- Digital case i.e. full or partial digital procedure "The Berlin Concept"

MUNICH

Munich is a fascinating place to explore, and it presents two very different faces to the world. The first is that of a modern metropolis, driven by technology and innovation, somewhat characterized by the likes of BMW and FC Bayern Munich, the successful football team whose 21st-century stadium on the city outskirts looks like an enormous spacecraft. The second is that of a deeply traditional town, best known for the beer-swilling rumpus of Oktoberfest but defined year-round by dirndl-wearing waitresses, gingerbread architecture and warm hospitality.

There are modern art galleries and glitzy nightclubs, medieval churches and dynastic palaces, riverside cafés and historic theatres. Its museums play home to some genuinely world-class collections of art too, not least at the three superb Pinakothek galleries.

The most famous part of the Munich skyline is the 15th-century Frauenkirche, famous for its 100m-high (328ft) towers twin, and the possibility to climb to the top for far-reaching views over the city. Munich's most popular market for fresh food and delicatessen, the Viktualienmarkt, is well worth a visit. The Weisswurst (white sausage) is a local specialty. Traditionally eaten only before noon – a tradition dating to a time before refrigerators – these morsels are served with sweet mustard and freshly baked pretzels.

2005 Center for Implantology and Periodontology in Amstelveen – Netherlands. Shared remitter practices with Dr. de Lange

2009 Foundation of Private Dental Clinic with Dr. Claudio Cacaci in Munich, Implant Competence Center Munich

2010 Co-Author with Carlo Maiorana, Mario Beretta, Claudio Cacaci of the Book "Manual of Oral Implantology"

Scientific work and publications in the field of dental implantology, especially in praeimplantological diagnosis and three dimensional navigation of dental implants. So as implant site development soft tissue management and prosthetics on dental implants.

Since 1999 national and international lecturing on the surgical and prosthetic aspects of implant dentistry.

POSSIBLE DATES

(Arrival 1 day in advance)

23. June – 24. June 2017

PARTICIPANTS

Minimum 8 participants
Maximum 12 participants

TOPICS

Theory

- Esthetic restorative procedures
- Soft tissue enhancement
- Soft tissue grafting
- Tunnel techniques
- Suturing techniques
- Prototype crowns
- Emergence profile development
- Clinical case presentation
- Clinical case discussion
- Screw retained reconstruction (with COMFOUR system)
- 3D planning for guided surgery
- Immediate temporary restorations
- CAD/CAM

Hands-on exercises

- Pig ears
- Various suture techniques
- Grafting procedures/design
- Harvesting techniques for soft tissue grafts
- Implant placement
- Abutment installation soft tissue grafting
- Recession coverage

Live-Surgery

- Second stage surgery
- Roll flaps
- Installation of a prototype restoration
- Development of an emergence profile in the esthetic zone
- Implant surgery with GBR in the esthetic zone
- Direct prefabricated temporary restoration
- COMFOUR the new screw retaining system

SEVILLA

Welcome to one of the most charming cities of Spain. The city of Seville is famous worldwide for its culture, monuments, traditions and artistic heritage. This is the birthplace of Flamenco and is the city, where the most amazing Easter processions take place. But Seville is also the neuralgic center of the South of Spain, a city full of life and possibilities. Seville's rich history has left the city stuffed with innumerable monuments like, the third largest cathedral in the world, the Giralda tower, the wonderful palace of the Reales Alcázares, the magical Barrio of Santa Cruz with its narrow streets, the Maestranza bullfighting ring and the passion for Flamenco and the perfume of orange blossoms on every corner.

When Christopher Columbus arrived here in Seville, this was the richest and most outstanding city in the kingdom of Spain, both in population

as for having the most important port in Spain. The locals here are called Sevillanos and they are friendly, fun, outgoing, and guapos (handsome/pretty). Life works definitely slower here and people work to live not live to work. Want to try some local food, than go for tapas, small but delicious dishes or Andalucian gazpacho (chilled tomato soup served with chunks of cucumbers and hard boiled eggs) and tortilla Espanola (egg and potato type of omelette torte) which are served in most establishments.

One thing nobody should miss while in Seville is a real flamenco show to feel the duende, (the special flamenco magic "soul") performed by talented flamenco artists who strum and strut their way through a performance of spiraling drama in a typical tablao bar, packed with enthusiastic aficionados and tourist who shout encouraging "óles" .

Dr. Carlos Repullo

Dentalhouse
Ildefonso Marañón Lavín 12

Tel. +34 954 252 679

CARLOS REPULLO

In our modern CAD education center which fully is equipped with the latest Cerec system soft/hardware we focus on a profound understanding of the digital workflow and related procedures in implant dentistry in order to carry out a completely digital dental treatment from the initial planning to the final restoration.

We have been using a new approach in treatment protocols to optimize and maximize the advantages of the Cerec system to the benefits of our patients and course participants.

Our goal is to use and teach the latest up-dates in technique and materials related to chair side CAD/CAM procedures and this in conjunction with implant dentistry which we use in our clinic on a daily base.

DR. CARLOS REPULLO

Dentist, Implantology, Prosthodontist

Education

Dr. Carlos Repullo, DDS graduated from the ISCS-SUL in Lisbon, Portugal. He has 18 years experience in Implant Dentistry and currently practices in Sevilla, Spain. He received his degree in Implant Dentistry by the prestigious Royal College of Surgeons of England (London UK) and the advance certificate in Implant Dentistry (RCS, London UK).

He is also certified CEREC trainer by the International Society of Computerized Dentistry, ISCD, Apollo DI trainer and graduated of the Sirona Speaker Academy.

He is a Member of PEERS Iberica and the Academy of Digital Dentistry. Co-founder of CADDENTAL Academy and Sirona CEREC Advocate.

Dr. Repullo lectures about CAD/CAM Dentistry, Digital Implant Dentistry, Guided Surgery and CBCT in English, Portuguese and Spanish speaking countries.

POSSIBLE DATES

(Arrival 1 day in advance)

10. March – 11. March 2017

29. September – 30. September 2017

PARTICIPANTS

Minimum 8 participants
Maximum 12 participants

TOPICS**Theory**

- Profound understanding of the digital workflow
- Software Cerec for implant restorations
- Digital impressions direct and indirect
- iSy implants and system overview
- iSy Ti-Base CAD/CAM and scan posts
- Materials for CAD/CAM restorations on Ti-Base
- Soft tissue moulding
- Guided surgery with Cerec guide 2
- 5 step technique to design implant restorations
- **DAP** technique – **D**igitally **A**ssisted **P**rotocol
- Abutment/crown characterization techniques

Hands-on exercises

- Software Cerec and design of implant bone restorations
- Planning guided surgery
- Digital impressions direct and indirect
- iSy implants surgical procedure
- Bonding procedure on iSy Ti-Base CAD/CAM step by step
- Abutment/crown characterization techniques

Live-Surgery

- Implant placement
- Digital impressions
- Hybrid Abutment design step by step
- Milling procedure abutment/crown
- Finalization and characterization abutment/ crown
- Bonding procedure on iSy Ti-Base CAD/CAM
- Insertion of final restoration
